## **NEWS RELEASE**

### **Engine Pro Publishes New Diesel Engine Parts Catalog**

**Contact:** Jesse Jones - [jjones@enginepro.com](mailto:jjones@enginepro.com)

October 19, 2020

Engine Pro has published a revised and expanded diesel engine parts catalog now featuring O.E. replacement applications along with a broad range of diesel performance parts. The catalog, available in print and as a free online download, covers Dodge/Ram Cummins, Ford Power Stroke and GM Duramax engines. The diesel performance section features valves, drop-in springs, valve stem seals, pushrods and camshafts. The O.E section includes listings for pistons, rings, pin bushings, cylinder repair sleeves, bearings, gaskets, head bolts, camshafts, oil pumps, timing gears and valve train components.

The catalog may be downloaded free at [www.enginepro.com](http://www.enginepro.com). A printed version is available from any Engine Pro warehouse distributor.

Engine Pro President, Jesse Jones said, “We created this catalog especially for automotive machine shops who say they want high quality diesel engine parts for both performance and stock replacement needs. Now they can find them all in one catalog.” Jones pointed out that as with all Engine Pro brand products, the diesel engine parts offered in this new catalog meet and usually exceed competing brands’ offerings.

Engine Pro is the largest engine parts distribution network in the U.S. and Australia, and is a major supplier of engine parts in Europe. Operating from 34 independent warehouses, the group distributes all major aftermarket and performance brands, featuring Engine Pro and Nitro Black products for domestic and import cars, trucks, heavy duty, industrial, marine, agricultural and performance applications.
